- ✓ It expects enhanced customer service and a reduction of costs through electronic and secure delivery.
- ✓ e-Statement can be easily retrieved from the Bank's portal anytime and anywhere when needed.
- ✓ It is the best and cheapest cross selling tool and advertisement.
- ✓ It provides **secured and tamperproof platform** in with **blockchain security, password protected, hash value and CA.**
- ✓ It helps customer to reduce costs, increase transparency, enhance security and increase efficiency among others.

E-policy

E-receipt

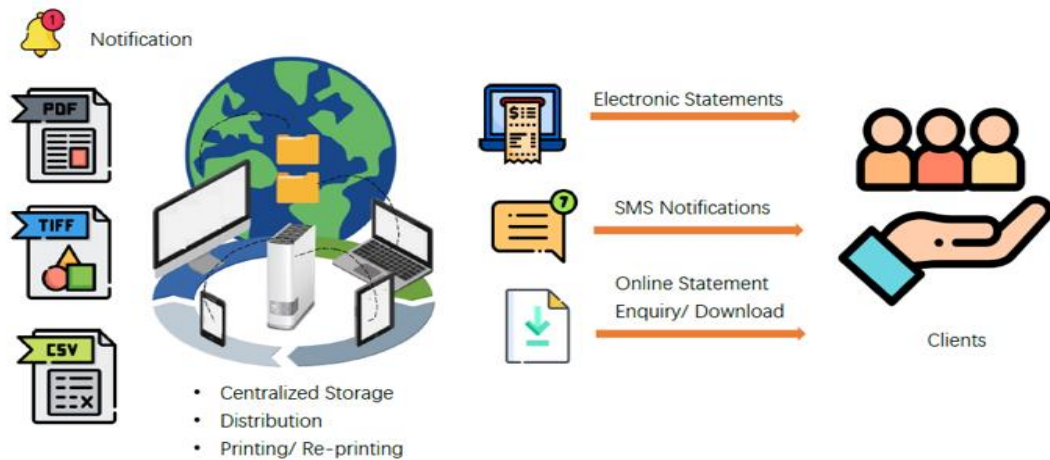

Economic Value to Customer

- **Reduce operation cost and increase customer satisfaction.** Savings on postage, printing, handling and administrative cost. Re-generation of e-Statement, e-policy and e-receipt are fast and easy
- **Improved market positioning** through technology- access through tablets and superior customer service
- **Improved speed of delivery** and reduce cost
- **Enhanced account control** and cross selling
- Enhanced user experience
- Project the company as an environmentally responsible citizen

Report Management Solution

Docuflo Enterprise Report Management Solution (RMS) consolidates and stores all your reports from any back-office core systems and output content into a secure, central repository, enabling cost-effective access and distribution of these reports to all your employees, customers, and partners.

Docuflo RMS system reduces the problems and costs of printing, storing, and distributing large quantities of reports. Reports are pushed to users' dashboard daily and access via web browser or tablets. Reports can be organized into daily, weekly, monthly, yearly categories. Access to these reports are controlled based on the approved access control rights.

Docuflo RMS System maintains a library of reports, and enables you to search, view and work with these reports online. Docuflo RMS helps you attain your business objectives:

- ✓ Daily / new reports folder
- ✓ Easy to use web interface
- ✓ Improved navigation capabilities, online viewing
- ✓ Single point of access to reports and documents
- ✓ Increasing the availability of reports information
- ✓ Provides secure search, viewing, download and print functions.
- ✓ Enhancing end-user productivity
- ✓ Security controls prevent unauthorized viewing and printing of reports
- ✓ Auditability – all accesses are logged and traceable
- ✓ Delivers reports to predetermined group and according to security rules.
- ✓ Delivers reports in a wide variety of formats, including PDF, ASCII Text
- ✓ Email notification
- ✓ Supports collaboration
- ✓ Support integration to company Intranet web portal for easy access through subscriptions
